Table Finding Guide—Subjects by Type of Area and Table Number

The guide lists all subjects covered in the report but does not indicate all cross-classifications (by age, sex, etc.) or the historical data shown in some tables. Data on allocation rates appear in tables B-1 through B-4a. For meanings of abbreviations, see the Introduction. For a description of area classifications, see appendix A. For definitions and explanations of subject characteristics, see appendix B.

Subject	Puerto Rico		SCSA, SMSA's Urbanized Areas, Central Cities of SMSA's	Places ¹ of—				Municipios	
	Total	Urban and Rural and Size of Place, Inside and Outside SMSA's		50,000 or More	10,000 to 50,000	2,500 to 10,000	1,000 to 2,500	Total	Rural Population

BUREAU OF THE CENSUS

Bruce Chapman, Director

C. L. Kincannon, Deputy Director

POPULATION DIVISION

Roger A. Herriot, Chief

Acknowledgments

Many persons participated in the diverse activities of the 1980 census. These acknowledgments generally reflect the staff during the census-taking process. The Bureau was guided by then Director, **Vincent P. Barabba**, and then Deputy Director, **Daniel B. Levine**. Primary direction of the census program was performed by **George E. Hall**, then Associate Director for Demographic Fields, assisted by **Earle J. Gerson**, then Assistant Director for Demographic Censuses, in conjunction with **Barbara A. Bailar**, Associate Director for Statistical Standards and Methodology, **Howard N. Hamilton**, Assistant Director for Computer Services, **Shirley Kallek**, Associate Director for Economic Fields, **James D. Lincoln**, Associate Director for Administration, **Rex L. Pullin**, then Associate Director for Field Operations, and **W. Bruce Ramsay**, then Associate Director for Information Technology. The director's staff was assisted by **Peter A. Bounpane** and **Sherry L. Courtland**.

Responsibility for developing the population portion of the 1980 census questionnaire content and designing the tabulations was in the Population Division, under the supervision of **Meyer Zitter**, then Chief, **Paula J. Schneider**, Staff Assistant for Census Programs, **Roger A. Herriot**, **Nampeo D. McKenney**, and **Arthur J. Norton**, Assistant Chiefs. This report was prepared by **Cynthia M. Taeuber**, assisted by **Michael J. Levin** and **Peggy Payne**. Important contributions were provided by **Patricia A. Berman**, **Robert O. Grymes** and **Gloria J. Porter**.

Responsibility for the overall planning, coordinating, and processing of the 1980 census was in the Decennial Census Division under the direction of **Gerald J. Post**, then Acting Chief, assisted by **Marie G. Argana**, **Rachel F. Brown**, **Donald R. Dalzell**, **H. Ray Dennis**, **Leonard Goldberg**, **Morris Gorinson**, **Earle B. Knapp, Jr.**, and **Roger O. Lepage**. The Outlying Areas Branch was under the direction of **Carmina Fernández Young**, then Chief, assisted by **Irma F. Harahush** and **Angel M. Landrón**.

Data base and generalized system support was developed and provided by Systems Development Division, **Judy M. Bedell**, Chief,

under the direction of **John Jerry Bell**, then Assistant Chief.

Computer processing was performed in the Computer Operations Division, **C. Thomas DiNenna**, then Chief, and **John E. Halterman**, then Assistant Chief.

The Statistical Methods Division was largely responsible for developing new procedures to obtain a more accurate count of the population. This work was supervised by **Charles D. Jones**, Chief, **David V. Bateman**, then Assistant Chief, **Susan M. Miskura** and **Robert T. O'Reagan**, Assistant Chiefs.

Geographic programs and plans were developed in the Geography Division under the direction of **Gerald F. Cranford**, then Assistant Chief, **Robert W. Marx** and **Silla G. Tomasi**, Assistant Chiefs, and **Donald I. Hirschfeld**, Special Assistant. **Joseph J. Knott** coordinated geographic operational phases.

Data collection activities were supervised in the Field Division by **Richard C. Burt**, then Chief, under the direction of **Lawrence T. Love** and **Stanley D. Matchett**, then Assistant Chiefs, with the assistance of the directors and assistant directors of the Bureau's regional offices.

The coordination and acquisition of automatic data processing equipment were the responsibility of the Automatic Data Processing Planning Staff, **James R. Pepal**, then Chief, under the direction of **Richard L. Pauly**, then Deputy Chief.

The system design, technical specifications, construction, and installation of the FOSDIC and Automated Camera Technology System were the responsibility of the Technical Services Division, **McRae Anderson**, then Chief, assisted by **Robert E. Joseph**, then Assistant Chief.

Questionnaire processing procedures were developed in the Decennial Processing Staff, **James S. Werking**, then Chief, under the direction of **Harry C. O'Haver**, then Assistant Chief. The manual processing and microfilming of the questionnaires were performed at the Laguna Niguel Processing Office, **Robert N. Scheller**, Chief.

Administrative support was provided by the Administrative Services Division, **O. Bryant Benton**, then Acting Chief.

Publications editing, printing, and composition were performed in the Publications Services Division, **Raymond J. Koski**, Chief, under the direction of **Milton S. Andersen**, **Arlene C. Duckett**, and **Gerald A. Mann**.

User services were provided by the Data User Services Division under the supervision of **Michael G. Garland**, Chief, and **Marshall L. Turner**, Assistant Chief.

Many other persons participated in the various activities of the 1980 census. For a list of key personnel, refer to the *History of the 1980 Census of Population and Housing*, (PHC80-R2).

Introduction

GENERAL	III
CONTENTS OF THE REPORT	III
SYMBOLS AND GEOGRAPHIC ABBREVIATIONS	III
SUPPRESSION OF DATA FOR CONFIDENTIALITY	IV

GENERAL

This report presents 100-percent data from the 1980 Census of Population on basic demographic characteristics of the inhabitants of Puerto Rico, its municipios, municipio subdivisions, places of 1,000 or more inhabitants, standard consolidated statistical area, standard metropolitan statistical areas, urbanized areas, and certain other geographic areas (e.g., urban and rural portions of Puerto Rico). The abbreviated identification for this report is PC80-1-B (i.e., Population Census, 1980-Volume 1-Chapter B) followed by the number 53 representing Puerto Rico. Legal provision for this census, which was conducted as of April 1, 1980, was made in the Act of Congress of August 31, 1954 (amended August 1957, December 1975, and October 1976), which codified Title 13, United States Code.

A large portion of the information compiled from the 1980 Census of Population will appear in Volume 1, *Characteristics of the Population*, of which this report is part.

The 1980 census figures presented here may differ from those shown in the *Advance Reports*, PHC80-V. The changes reflect corrections of errors found after the PHC80-V reports were prepared. The changes may affect any geographic area shown in this report.

The content and procedures of the 1980 census were determined after evaluation of the results of the 1970 census, consultation with a wide variety

of users of census data, and extensive field testing. A number of changes were introduced in 1980 to improve the usefulness of census results. However, the changes do not affect to any appreciable extent the comparability between the 1980 data and the 1970 data shown in this report. Further information on comparability appears in Appendix B, "Definitions and Explanations of Subject Characteristics."

More detailed information on the technical and procedural matters covered in the text of this report can be obtained by writing to the Director, Bureau of the Census, Washington, D.C., 20233. Such information will also appear in other publications of the 1980 census.

CONTENTS OF THE REPORT

This report contains a text (this introduction and five appendixes), a table of contents, 41 detailed tables, and maps. A map of the Caribbean area and a map of Puerto Rico appear after the table of contents. The map of Puerto Rico shows municipio names and boundaries, the name and boundaries of the standard consolidated statistical area (SCSA) and each standard metropolitan statistical area (SMSA), the names and location of all places with a population of 25,000 or more, and SMSA central cities with fewer than 25,000 inhabitants. Then follow 41 detailed tables and 5 tables covering substitutions and allocations (see Appendix D, "Accuracy of the Data"). Each table is identified by a table number and title. The "stubhead" at the left under the title defines the types of geographic areas for which data are shown in the particular table and is considered part of the table title.

The first table in this report is table 14; tables 1 to 13 appear in the *Number of*

Inhabitants, PC80-1-A, report for Puerto Rico. Data are presented in this report on age, sex, relationship to householder, and marital status. A table finding guide on the inside front cover shows the tables in which the various types of statistics appear.

In general, the amount of detail presented in this report is greater for areas with more population than for less populated areas. Data from earlier censuses are generally included for larger areas only. The greatest amount of detail is shown for Puerto Rico, its urban and rural parts, the SCSA, SMSA's, urbanized areas, places with a population of 10,000 or more, and municipios. Less detail is shown for places of 2,500 to 10,000 and for rural portions of municipios. The least amount of detail is shown for places of 1,000 to 2,500 and for municipio subdivisions.

The tables are followed by a map section which includes:

- A "Municipio Location Index" which presents the reference coordinates and map section numbers for each municipio on the municipio subdivision map, the legend to the municipio subdivision map, and a small map of Puerto Rico outlining the geographic area covered by each municipio subdivision map section.
- A municipio subdivision map covering several pages that shows the names and boundaries of municipios, municipio subdivisions, subbarrios, and places, as recognized by the Census Bureau in the published tables. Boundaries of places of fewer than 1,000 persons are shown on this map, although they are not shown in the tables of this report. Appearing last in the report are the appendixes. Appendix A describes the various area classifications (e.g., urban

and rural residence, places, and urbanized areas). Appendix B provides definitions and explanations for the subjects covered in this report. Appendix C explains the residence rules used in counting the population and describes the data collection and processing procedures. Appendix D presents information on the sources of error in the data, editing procedures, and a description of allocation and substitution tables B-1 to B-4a. Appendix E contains facsimiles of the respondent instructions and the 1980 census questionnaire pages showing the 100-percent population questions.

SYMBOLS AND GEOGRAPHIC ABBREVIATIONS

The following symbols and geographic abbreviations are used in the tables:

- A dash “—” represents zero or a percent which rounds to less than 0.1.
- Three dots “...” mean not applicable, or that the data are being withheld to avoid disclosure of information for

individuals. (For further information on disclosure, see the section below on “Suppression of Data for Confidentiality.”)

- (NA) means not available.
- A minus sign preceding a figure denotes decrease.
- SCSA is standard consolidated statistical area.
- SMSA is standard metropolitan statistical area.

SUPPRESSION OF DATA FOR CONFIDENTIALITY

To maintain the confidentiality promised to respondents and required by law, the Census Bureau takes precautions to make sure that its published data do not disclose information about particular individuals and housing units. To accomplish this, the Bureau suppresses data for some characteristics which are based on a small number of persons and/or housing units in the geographic area. Under certain conditions, both primary and complementary suppression may take place.

The general rules of primary suppression are as follows: counts of total persons are never suppressed; characteristics for persons are shown only if there are 15 or more persons in the geographic area; counts of total housing units, vacant housing units, year-round housing units, and occupied housing units are never suppressed; characteristics of year-round housing units which are not classified by occupancy status are shown only when there are five or more year-round housing units in the geographic area; characteristics of families, households or occupied housing units are shown only if there are at least five occupied housing units within the geographic area; and distributions of data for owners or renters are shown only where the number of owners is at least five and the number of renters is also at least five. These primary suppression criteria are applied independently of one another.

In some cases, complementary suppression is applied to prevent the derivation of primary suppressed data by subtraction.

Table 35. Household Relationship for Municipios: 1980

[For meaning of symbols, see Introduction. For definitions of terms, see appendixes A and B]

Municipios

Total persons	18 786
In households	18 747
Householder	4 647
15 to 24 years	325
25 to 34 years	877
35 to 44 years	850
45 to 54 years	785
55 to 64 years	742
65 to 74 years	691
75 years and over	377
Family householder:	
Male	3 428
Female	711
Nonfamily householder:	
Male	261
Female	247
Spouse	3 307
Child	9 189
Other relatives	1 508
Nonrelatives	96
Inmate of institution	—
Other, in group quarters	39
Persons 75 years and over living alone	109
Persons per household	4.03
Persons per family	4.38

Asterisk following place name indicates place is coextensive with a municipio subdivision. Municipio subdivision name is shown only when it differs from place name.

Un asterisco después del nombre de un lugar indica que el lugar es coextensivo con la subdivisión del municipio. Se muestra el nombre de la subdivisión del municipio únicamente cuando difiere del nombre del lugar.

Note: All political boundaries are as of January 1, 1980. Boundaries of small areas may not be depicted exactly due to scale of map. Where boundaries coincide, boundary symbol of higher level geographic area is shown.

Nota: Todos los límites políticos según definidos al 1º de enero de 1980. Los límites de áreas pequeñas pueden no estar trazados con exactitud debido a la escala del mapa. Donde los límites coinciden, se muestra el símbolo del límite del área de más alto nivel geográfico.

PUERTO RICO

The 78 municipios are the constituent units of Puerto Rico.

MUNICIPIOS

In Puerto Rico the primary divisions are termed municipios. Each municipio has legally established boundaries and constitutes a governmental unit. Two municipios have been created since 1970, Canóvanas and Florida, which were separated from Loíza and Barceloneta municipios, respectively. Each municipio, with the exception of Florida, contains a ciudad or pueblo in which the seat of government is located. Florida municipio has its seat of government in the Florida Adentro barrio.

MUNICIPIO SUBDIVISIONS

Statistics for subdivisions of municipios are presented as follows:

1. Ciudades, pueblos, barrios. Barrios are the primary subdivisions of municipios. The barrios have legally established boundaries, but do not constitute a governmental unit. Ciudad (which must have a population of at least 50,000) or pueblo is the name given to the barrio or group of barrios which identifies the municipio center of government. Ciudades, pueblos, and barrios essentially serve as election districts and as the basis for apportionment of the Commonwealth legislature. Many municipio subdivisions have been redefined by the Bureau since 1970 to reflect their legal boundaries, which were not used in many instances in 1970 census reports. There are two ciudades in Puerto Rico—Ponce and San Juan. These ciudades consist entirely of groups of barrios.
2. Subbarrios. The subbarrios serve as electoral and representational entities, further subdividing some pueblos and, in three municipios—Ponce, San Juan, and Salinas—one or more barrios of the ciudad or a barrio outside the pueblo. There are subbarrios in 23 municipios.

PLACES

Two types of places are recognized in the stateside census reports—incorporated places and census designated places—as defined below.

In this report, central cities of standard metropolitan statistical areas, regardless of population, are shown only in the tables designated "... for Areas and Places." Thus, a central city with a population between 10,000 and 50,000 will not appear in the tables for places of 10,000 to 50,000.

Incorporated Places

Incorporated places recognized in the reports of the census are those which are incorporated under the laws of their respective states as cities, boroughs, towns, and villages. There are no incorporated places in Puerto Rico. Although ciudades and pueblos in Puerto Rico have legally established limits, they are not incorporated and are recognized for census purposes as municipio subdivisions rather than as places.

Census Designated Places

As in the 1950, 1960, and 1970 censuses, the Census Bureau, in cooperation with the Puerto Rico government, delineated the boundaries for closely settled population centers without corporate limits. In 1980, such places are referred to as "census designated places" and in Puerto Rico are identified as "zonas urbanas" and "aldeas." To be recognized for the 1980 census, aldeas must have a minimum 1980 population of 1,000; zonas urbanas are recognized regardless of population size.

Zonas urbanas and aldea boundaries change with changes in the settlement pattern; a place which has the same name as in previous censuses does not necessarily have the same boundaries. Boundary outlines for zonas urbanas and aldeas are shown on the municipio subdivision map which follows the detailed tables. Detailed maps are available for purchase from the Census Bureau.

Zonas Urbanas—Zonas urbanas are composed of the municipio seat of government—i.e., a ciudad or pueblo (except in Florida municipio)—and the adjacent built-up area. Zonas urbanas are delineated by the Puerto Rico Planning Board under the authorization of the Puerto Rico Planning Act of 1975. Figures are

published for all zonas urbanas regardless of the number of inhabitants. In the 1970 census publications, zonas urbanas were incorrectly referred to as ciudades and pueblos, simultaneously disregarding the legal ciudad and pueblo boundaries. Zonas urbanas had not been recognized prior to the 1970 census.

Aldeas—Aldeas are closely settled population centers with no legally defined limits. The aldea boundaries were delineated by the Puerto Rico Planning Board following procedures established by the Census Bureau. To be recognized for publication in the 1980 census, aldeas must have a minimum 1980 population of 1,000 inhabitants.

URBAN AND RURAL RESIDENCE

As defined for the 1980 census, the urban population comprises all persons living in urbanized areas and in places of 2,500 or more inhabitants outside urbanized areas. More specifically, the urban population consists of all persons living in (1) zonas urbanas and aldeas of 2,500 or more inhabitants and (2) other territory included in urbanized areas. The population not classified as urban constitutes the rural population.

In censuses prior to 1960, before urbanized areas were established in Puerto Rico, the urban population comprised all persons living in ciudades, pueblos, and aldeas of 2,500 or more inhabitants. A definition of urban population restricted to such entities having 2,500 or more inhabitants excludes a number of large and densely settled areas merely because they are not identified as places.

To improve its measure of the urban population, the Bureau of the Census in 1950 adopted the concept of the urbanized area, which was applied to Puerto Rico in 1960. For the 1960 census, the urban population of Puerto Rico was defined as all persons residing in urbanized areas and, outside those areas, in all ciudades, pueblos, and aldeas which had 2,500 or more inhabitants. The 1960 definition of urban has continued substantially unchanged. Changes since 1970 in the criteria for defining central cities have permitted urbanized areas to be defined around smaller centers.

URBANIZED AREAS

Definition

The major objective of the Census Bureau in delineating urbanized areas is to provide a better separation of urban and rural population in the vicinity of large cities. An urbanized area consists of a central city or cities and surrounding closely settled territory (urban fringe).

The following criteria are used in determining the eligibility and definition of the 1980 urbanized areas:¹

An urbanized area comprises a place and adjacent densely settled surrounding area that together have a minimum population of 50,000.² The densely settled surrounding area consists of:

1. Contiguous places having:
 - a. A population of 2,500 or more; or,
 - b. A population of fewer than 2,500 but having a population density of 1,000 persons per square mile, a closely settled area containing a minimum of 50 percent of the population, or a cluster of at least 100 housing units.
2. Contiguous area which is connected by road and has a population density of at least 1,000 persons per square mile.³
3. Other contiguous area with a density of less than 1,000 persons per square mile, provided that it:
 - a. Eliminates an enclave of less than 5 square miles which is surrounded by a built-up area.
 - b. Closes an indentation in the boundary of the densely settled area that is no more than 1 mile across the open end and encompasses no more than 5 square miles.
 - c. Links an outlying area of qualifying density, provided that the outlying area is:
 - (1) Connected by road to, and is not more than 1½ miles from,

¹ All references to population counts and densities relate to data from the 1980 census.

² For an urbanized area to be recognized, it must include a population of at least 25,000 that does not reside on a military base.

³ Any area of extensive nonresidential urban land use, such as airports, factories, parks, golf courses, and cemeteries, is excluded in computing the population density.

the main body of the urbanized area; and

- (2) Separated from the main body of the urbanized area by water or other undevelopable area, is connected by road to the main body of the urbanized area, and is not more than 5 miles from the main body of the urbanized area.

4. Large concentrations of nonresidential urban area (such as industrial parks, office areas, and major airports) which have at least one-quarter of their boundary contiguous to an urbanized area.

A map of each urbanized area in Puerto Rico appears in the PC80-1-A report for Puerto Rico.

Urbanized Area Titles

1. The titles of urbanized areas existing prior to the 1980 Census of Population and Housing are retained unchanged except for mergers and for those areas meeting item 4 of the titling criteria.
2. The titles of new urbanized areas qualifying as the result of the 1980 census are determined as follows:
 - a. The name of the place with the largest population in the urbanized area is always listed.
 - b. The names of up to two additional places may be listed, with eligibility determined as follows:
 - (1) Those with a population of at least 250,000.
 - (2) Those with a population of 15,000 to 250,000, provided that they are at least one-third the population of the largest place in the urbanized area.
3. Area titles that include the names of more than one place start with the name of the largest and list the others in descending order of their population.
4. Regional titles may be used to identify urbanized areas with populations over 1 million, in which case only the largest place of the urbanized area is included in the title.

Urbanized Area Central Cities

The central cities of urbanized areas are those places named in the titles except where regional titles are used. In such cases, the central cities are those that have qualified under items 1 or 2 of the titling criteria.

STANDARD METROPOLITAN STATISTICAL AREAS

Definition

The general concept of a metropolitan area is one of a large population nucleus together with adjacent communities which have a high degree of economic and social integration with that nucleus. The standard metropolitan statistical area (SMSA) classification is a statistical standard developed for use by Federal agencies in the production, analysis, and publication of data on metropolitan areas. The SMSA's are designated and defined by the Office of Management and Budget, following a set of official published standards developed by the interagency Federal Committee on Standard Metropolitan Statistical Areas.

Each SMSA in Puerto Rico has one or more central municipios containing the area's main population concentration: an urbanized area with at least 50,000 inhabitants. An SMSA may also include outlying municipios which have close economic and social relationships with the central municipios. The outlying municipios must have a specified level of commuting to the central municipios and must also meet certain standards regarding metropolitan character, such as population density, urban population, and population growth.

The population living in SMSA's is referred to as the metropolitan population. The population is subdivided into "inside central city (or cities)" and "outside central city (or cities)." The population living outside SMSA's constitutes the nonmetropolitan population.

SMSA Titles

Most SMSA's have at least one central city. The titles of SMSA's may include up to three place names. For the 1980 census, central cities of SMSA's are those

named in the titles of the SMSA's. In Puerto Rico, zonas urbanas and aldeas may be recognized as central cities.

In this report, central cities of standard metropolitan statistical areas, regardless of population, are shown only in the tables designated ". . . for Areas and Places." Thus, a central city with a population between 10,000 and 50,000 will not appear in the tables for places of 10,000 to 50,000.

New SMSA Standards

New standards for designating and defining metropolitan statistical areas in the United States and Puerto Rico were published in the *Federal Register* on January 3, 1980. The SMSA's recognized for the 1980 census comprise (1) all areas, including four in Puerto Rico, as defined on January 1, 1980: one area in the United States was defined provisionally during the 1970's on the basis of population estimates but its qualification was not confirmed by 1980 census counts and (2) a group of new areas, including one in Puerto Rico, (Arecibo) defined on the basis of 1980 census counts and the new standards that were published on January 3, 1980.

The new standards will not be applied to the areas existing on January 1, 1980, until after data on commuting flows become available from 1980 census tabulations. At that time, the boundaries, definitions, and titles for all SMSA's will be reviewed.

To aid users who want to become familiar with the SMSA standards and how they are applied, documents are available from the Office of Management and Budget, Washington, D.C. 20503.

STANDARD CONSOLIDATED STATISTICAL AREA

In one part of Puerto Rico, metropolitan development has progressed to the point that adjoining SMSA's are themselves socially and economically interrelated. This area is designated as a standard consolidated statistical area (SCSA) by the Office of Management and Budget, and is defined using standards included as part of the new SMSA standards described above.

RELATIONSHIP BETWEEN URBANIZED AREAS AND METROPOLITAN AREAS

Although the urbanized area and the metropolitan area are closely related in concept, there are important differences. The urbanized area has a more limited territory. The urbanized area consists of the continuously built-up territory around each central city and thus generally corresponds to the core of high and medium population density at the heart of the metropolitan area. In concept, a metropolitan area is always larger than its core urbanized area, because it includes discontinuous urban and suburban development beyond the periphery of the continuously built-up area. The metropolitan area may also include rural territory whose residents commute to work in the central city or its immediate environs, while the urbanized area does not include such territory. In practice, because the SMSA definition uses municipios as building blocks, considerable amounts of rural territory with few commuters are often included.

Occasionally, a portion of the urbanized area extends across the SMSA boundary into a nonmetropolitan municipio or another SMSA. However, such portions are usually quite small in area and population.

The new standards provide that each SMSA be associated with an urbanized area. However, the reverse is not true—there are some urbanized areas that are not in any SMSA. This situation occurs when an urbanized area does not qualify as an SMSA of at least 100,000 population and the urbanized area has no place with at least 50,000 population.

In addition, some SMSA's contain more than one urbanized area. This occurs when—

1. Two or more urban concentrations not far apart and of generally similar size have separate urbanized areas but qualify as a single SMSA. Often the SMSA title includes the name of the largest city of each of the component urbanized areas.
2. A very large SMSA includes a large urbanized area and one or more smaller separate urbanized areas within its boundaries.

BOUNDARY CHANGES

The boundaries of some of the areas shown in this report have changed between an earlier census for which counts are shown and January 1, 1980. The historic counts shown here for municipios, some municipio subdivisions, subbarrios, places, and urbanized areas have not been adjusted for such changes and thus reflect the population in the areas as defined at each census. In 1970, the legal ciudad and pueblo boundaries in many municipios were disregarded to include the built-up areas of contiguous barrios. These areas were incorrectly referred to as ciudades and pueblos in the 1970 census publications. These places are equivalent to those identified as zonas urbanas in the 1980 census.

The historic counts for SMSA's and the SCSA have been adjusted to reflect the areas defined as of the 1980 census. Information on boundary changes for municipios and municipio subdivisions is presented in table 4 of the PC80-1-A report. For information on boundary

changes prior to 1970, see the *Number of Inhabitants* report for each census.

AREA MEASUREMENTS

Area measurement figures for municipios are available in table 2 of the PC80-1-A report for Puerto Rico.

HISTORIC COUNTS

As in past censuses, the general rule for presenting historic figures for Puerto Rico, its municipios, municipio subdivisions, and places is to present counts only for single, continually existing entities. Stated another way, if an area existed at both the current and previous censuses, a count is shown for the previous census. Included in this category are areas which are of the same type (municipio, barrio, or place) which have retained the same name or have changed their name. Also included are places which have

merged and retained the name of one of the merged areas.

In cases where entities were not recognized or have been formed since earlier censuses, such as a new municipio, municipio subdivision, or place, the symbol three dots "... " is shown for the earlier census. The three-dot symbol is also shown for those parts of a place which have extended into a new municipio or barrio through the expansion of boundaries. The symbol "(NA)" is shown in place of the 1970 population counts for those barrios, ciudades, and pueblos, where the boundaries used in the 1970 census did not represent the legally established boundaries.

In a number of tables in this report, historic counts are shown for individual areas and aggregations of areas such as population of places by size groups or urban and rural distributions. In some instances, population counts for individual areas have been revised since reports for earlier censuses. These revisions have not been carried through to the tables in this report. The corrections are indicated in certain tables of the PC80-1-A report.

MARITAL STATUS B-3

GENERAL

The 1980 census of Puerto Rico was conducted through a combination of self-enumeration and personal interview. The principal determinants for the responses were the questionnaire, the respondent instructions, and the instructions given to the enumerator. The definitions and explanations given below for each subject are drawn largely from various technical and procedural materials used in the collection of the data. Also included is certain explanatory information to assist the user in the proper utilization of the statistics.

Facsimiles of the questionnaire pages containing the 100-percent population questions used to produce the data shown in this report and the page of the respondent instructions which relates to these questions are presented in appendix E. The subjects are listed below in the order in which they are shown on the census questionnaire.

HOUSEHOLD, RELATIONSHIP
TO HOUSEHOLDER, FAMILY,
AND GROUP QUARTERS

Household

A household includes all the persons who occupy a housing unit. A housing

unit is a house, an apartment, a group of rooms, or a single room occupied as a separate living quarters, or if vacant, intended for occupancy as a separate living quarters. Separate living quarters are those in which the occupants live and eat separately from other persons in the building and have direct access from the outside of the building or through a common hall. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share living arrangements. The actual classification of a housing unit as a household depends on entries in question 2 and item B on the census questionnaire. Item B on type of unit or quarters was filled by an enumerator or a census office clerk for each housing unit or group quarters.

The measure "persons per household" is obtained by dividing the number of persons in households by the number of households (or householders).

Relationship to Householder

The data on relationship to householder were derived from answers to question 2, which was asked of all persons in housing units. Five basic categories of relationship are recognized in most tables of this report. More detailed categories of relationship will appear in the PC80-1-C and PC80-1-D reports (and summary tape files 4 and 5).

Householder—One person in each household is designated as the "householder." In most cases, this is the person, or one of the persons, in whose name the home is owned or rented and who is listed in column 1 of the census questionnaire. If there is no such person in the household, any adult household member could be designated as the "householder."

Two types of householders are distinguished—a family householder and a nonfamily householder. A family householder is a householder living with one or more persons related to him or her by birth, marriage, or adoption. The householder and all persons in the household related to him or her are family members. A nonfamily householder is a householder living alone or with nonrelatives only.

Spouse—A person married to and living with a householder. This category includes persons in formal marriages as well as consensually married persons. The number of spouses is equal to the number of "married-couple families."

Child—A son, daughter, stepchild, or adopted child of the householder regardless of the child's age or marital status. The category excludes sons-in-law and daughters-in-law. In this report, those classified as "own child of householder" are sons and daughters, including stepchildren and adopted children of the householder who are single (never married) and under 18 years of age.

Other Relative—Any person related to the householder by birth, marriage, or adoption, who is not shown separately in the particular table (e.g., "spouse," "child," "brother or sister," or "parent").

Nonrelative—Any person in the household not related to the householder by birth, marriage, or adoption. Roomers, boarders, roommates, paid employees, wards, and foster children are included in this category.

When relationship is not reported for an individual, it is allocated according to the responses for age and marital status for that person while maintaining consistency with responses for other individuals in the household. The allocation procedure is described in Appendix D, "Accuracy of the Data."

Family

A family consists of a householder and one or more other persons living in the same household who are related to the householder by birth, marriage, or adoption; all persons in a household who are related to the householder are regarded as members of his or her family. A "married-couple family" is a family in which the householder and spouse are enumerated as members of the same household. Not all households contain families, because a household may be composed of a group of unrelated persons or one person living alone. The measure "persons per family" is obtained by dividing the number of persons in families by the total number of families (or family householders).

Group Quarters

All persons not living in households are classified by the Bureau of the Census as living in group quarters. Two general categories of persons in group quarters are recognized:

Inmates of Institutions—Persons under care or custody in institutions at the time of enumeration are classified as "patients or inmates" of an institution regardless of their length of stay in that place and regardless of the number of people in that place. Institutions include homes, schools, hospitals, or wards for the physically or mentally handicapped; hospitals or wards for mental, tubercular, or chronic disease patients; homes for unmarried mothers; nursing, convalescent, and rest homes for the aged and dependent; orphanages; and correctional institutions.

Other—This category includes all persons living in group quarters who are not inmates of institutions. Rooming and boarding houses, communes, farm and non-farm workers' dormitories, convents or monasteries, and other living quarters are classified as "other" group quarters if there are 9 or more persons unrelated to the person listed in column 1 of the census questionnaire; or if 10 or more unrelated persons share the unit. Persons residing in certain other types of living arrangements are classified as living in "other" group quarters regardless of the number or relationship of people in the

unit. These include persons residing in military barracks, on ships, in college dormitories, or in sorority and fraternity houses; patients in general or maternity wards of hospitals who have no usual residence elsewhere; staff members in institutional quarters; and persons enumerated in missions, flophouses, Salvation Army shelters, etc.

Certain municipios, municipio subdivisions, and places have a high proportion of their total population in institutions, colleges, military posts, and other group quarters. These areas tend to have an unusual age distribution and to have other characteristics that affect statistics on birth, marriage, and death rates and other social and economic characteristics of the residents. Therefore, data on the population in households (which excludes the population in group quarters) are often more useful for such areas than data on the total population. Accordingly, in tables 39 and 39a of this report, age and sex for persons in households are only shown for those municipios, places, and ciudades/pueblos of 2,500 or more with 1,000 or more persons living in group quarters.

Comparability With 1970 Census Data—The 1980 definition of a household differs from that used in 1970 only in the change in the definition of housing unit to eliminate the requirement for complete kitchen facilities for the exclusive use of the household. The household reference person in 1970 was the "head of the household" (the husband in married-couple families); for 1980 it was changed to "the household member (or one of the members) in whose name the housing unit is owned or rented." In 1970, a unit in which 6 or more unrelated persons were living together was classified as group quarters; for 1980 that requirement was raised to 10 or more unrelated persons.

SEX

The data on sex were derived from answers to question 3, which was asked of all persons. At the time of field review, most cases in which sex was not reported were resolved by determining the appropriate entry from the person's given name and household relationship. When sex was not reported, it was allocated according

to the relationship to householder and the age and marital status of the person. The allocation process is described in Appendix D, "Accuracy of the Data."

AGE

The data on age were derived from answers to question 4, which was asked of all persons. Only the information in questions 4b and 4c (on month and year of birth) was read into the computer. Answers to question 4a (on age at last birthday) were not FOSDIC readable, but were used during field review to fill any blanks in question 4c. The age classification is based on the age of the person in completed years as of April 1, 1980. The data on age represent the difference, as calculated in the computer, between date of birth and April 1, 1980.

The median ages shown in this report for 1980 were computed from data for single years of age. If the median fell in the terminal category of an age distribution, the method of presentation was to show the initial age of the terminal category followed by a plus sign; thus, if the median fell in the category "85 years and over," it was shown as "85+." The median ages shown for 1970 may differ slightly from the figures published in the 1970 census reports because a different method of computation was used. Also, there may be slight differences between the 1980 median ages shown in this report and those in the *Summary Characteristics for Governmental Units and Standard Metropolitan Statistical Areas, PHC80-3*, because different age distributions were used to compute the medians.

In each census since 1950, the Bureau of the Census has assigned the age of a person when it was not reported. In censuses before 1950, persons of unknown age were shown as a separate category. In 1960, 1970, and 1980, assignment of unknown ages was performed by the allocation procedure described in Appendix D, "Accuracy of the Data."

FERTILITY RATIO

The fertility ratio shown in table 14 is the number of children under 5 years old per 1,000 women 15 to 49 years old.

MARITAL STATUS

The data on marital status were derived from answers to question 5, which was asked of all persons.

The marital status classification refers to the status at the time of enumeration. Persons classified as "now married" include those who have been married only once and have never been widowed or

divorced and those currently married persons who remarried after having been widowed or divorced. Consensually married persons are those living in a marital union without a civil or religious matrimonial contract and are classified as "now married"; they are reported separately as "consensually married." Persons reported as "separated" are those living apart because of marital discord, with or without a legal separation. Persons whose only

marriage had been annulled are classified as "never married," and all persons under 15 years old are classified as never married. All persons classified as "never married" are shown as "single" in this report.

When marital status was not reported, it was allocated according to the relationship to householder and sex and age of the person. The allocation process is described in Appendix D, "Accuracy of the Data."

Appendix C.—General Enumeration and Processing Procedures

USUAL PLACE OF RESIDENCE. . . C-1
U.S. Armed Forces C-1
Crews of Merchant Vessels C-1
Persons Away at School C-1
Persons in Institutions C-1
Persons Away from Their
Residence on Census Day C-1
Residents Abroad C-2
Citizens of Other Countries. . . . C-2
DATA COLLECTION
PROCEDURES. C-2
PROCESSING PROCEDURES. . . . C-2

USUAL PLACE OF RESIDENCE

In accordance with census practice dating back to the first U.S. census in 1790, each person enumerated in the 1980 census was counted as an inhabitant of his or her "usual place of residence," which is generally construed to mean the place where the person lives and sleeps most of the time. This place is not necessarily the same as the person's legal residence or voting residence. In the vast majority of cases, however, the use of these different bases of classification would produce substantially the same statistics, although there might be appreciable differences for a few areas.

The implementation of this practice has resulted in the establishment of residence rules for certain categories of persons whose usual place of residence is not immediately apparent. Furthermore, this practice means that persons were not always counted as residents of the place where they happened to be staying on Census Day (April 1). Persons without a usual place of residence, however, were counted where they happened to be staying.

U.S. Armed Forces

Members of the U.S. Armed Forces living on a military installation were counted, as in previous censuses, as residents of

the area in which the installation was located; members of the U.S. Armed Forces not living on a military installation were counted as residents of the areas in which they were living. Persons in families with U.S. Armed Forces personnel were counted where they were living on Census Day (i.e., the military installation or "off base," as the case might be).

Each Navy ship was attributed to the location that the Department of the Navy designated as its homeport, except for those ships which were deployed to the 6th or 7th Fleet on Census Day. As was done in the 1970 census, naval personnel aboard deployed ships were defined in the 1980 census as part of the overseas population, because deployment to the 6th or 7th Fleet implies a long-term overseas assignment. In homeports with fewer than 1,000 naval personnel assigned to ships, the crews were counted aboard the ship. In homeports with 1,000 or more naval personnel assigned to ships, those who indicated that they had a usual residence within 50 miles of the homeport of their ship were attributed to that residence. When a homeport designated by the Navy was contained in more than one geographic entity, ships homeported and berthed there on Census Day were assigned by the Bureau of the Census to the entity in which the land immediately adjacent to the dock or pier was actually located. Other ships attributed by the Navy to that homeport, but which were not physically present and not deployed to the 6th or 7th Fleet on Census Day, were allocated to the location named on the Navy's homeport list.

Crews of Merchant Vessels

Shipboard Census Reports were mailed to crews of merchant vessels through the ships' respective owner-operators based on lists of U.S. flag merchant vessels obtained from the Maritime Administration, U.S. Department of Commerce.

If a ship was berthed in a U.S. port on Census Day, the crew was enumerated as of that port. If the ship was not berthed in a U.S. port but was inside the territorial waters of the United States, the crew was enumerated as of (a) the port of destination if that port was inside the United States, including Puerto Rico, or (b) the homeport of the ship, including Puerto Rico, if its port of destination was outside the United States. Crews of U.S. flag vessels which were outside U.S. territorial waters on Census Day and crews of vessels flying a foreign flag were not enumerated in the 1980 census.

Persons Away at School

College students were counted as residents of the area in which they were living while attending college, as has been done since 1950. However, children in boarding schools below the college level were counted at their parental home.

Persons in Institutions

Inmates of institutions, who ordinarily live there for considerable periods of time, were counted as residents of the area where the institution was located. Patients in short-term wards (general, maternity, etc.) of hospitals were counted at their usual place of residence; if they had no usual place of residence, they were counted at the hospital.

Persons Away From Their Residence on Census Day

Persons in hotels, motels, etc., on the night of March 31, 1980, were requested to fill out a census form for assignment of their census information back to their homes if they indicated that no one was at home to report them in the census. A similar approach was used for persons visiting in private residences, as well as for persons who left Puerto Rico during

March 1980 via major intercontinental air or ship carriers for temporary travel abroad. In addition, information on persons away from their usual place of residence was obtained from other members of their families, resident managers, neighbors, etc. If an entire household was expected to be away during the whole period of the enumeration, information on that household was obtained from neighbors. A matching process was used to eliminate duplicate reports for persons who reported for themselves while away from their usual residence and who were also reported at this usual residence by someone else.

A special enumeration was conducted in such facilities as missions, jails, detention centers, etc., on the night of April 8, 1980, and persons enumerated therein were counted as residents of the area in which the establishment was located.

Residents Abroad

Residents of Puerto Rico who were abroad for an extended period (in the U.S. Armed Forces, working at civilian jobs, studying in universities, etc.) were not included in the population of Puerto Rico. On the other hand, residents of Puerto Rico who were temporarily abroad on vacations, business trips, and the like, were counted at their usual residence in Puerto Rico.

Citizens of Other Countries

Citizens of other countries having their usual residence (legally or illegally) in Puerto Rico on Census Day, including those working or attending school (but not living at a chancellery or consulate) were included in the enumeration, as were members of their families living with them. However, citizens of other countries temporarily visiting or traveling

in Puerto Rico or living on the premises of a chancellery or consulate were not enumerated in the 1980 census.

DATA COLLECTION PROCEDURES

The 1980 census of Puerto Rico was conducted through a combination of self-enumeration and personal interview. In areas with postal delivery service, an advance census questionnaire which contained explanatory information and the same questions as the short-form questionnaire was delivered by postal carrier to every household on his or her route several days before Census Day, April 1, 1980. The householder was requested to fill out the questionnaire and give it to the enumerator when he or she visited the household. Incomplete, inconsistent, and unfilled forms were completed by interview during the enumerator's visit. In areas without carrier delivery service, questionnaires were made available where people picked up their mail, and all housing units were enumerated through personal interview.

Each household in Puerto Rico was enumerated using one of two versions of the census questionnaire: a short-form questionnaire containing a limited number of basic population and housing questions or a long-form questionnaire containing these basic questions as well as a number of additional questions. A sampling procedure was used to determine those households which were to answer the long-form questionnaire. At the time of the enumerator's visit, one in every six households (about 17 percent) was asked to answer the long-form or sample questionnaire. Census questionnaires were available in Spanish and in English.

Special questionnaires were used for the enumeration of persons in group

quarters such as colleges and universities, hospitals, prisons, military installations, and ships. These forms contained the same population questions that appeared on either the short form or the long form, but did not include any housing questions.

PROCESSING PROCEDURES

The 1980 census questionnaires were processed in a manner similar to that for the 1970 Census. They were designed to be processed electronically by the Film Optical Sensing Device for Input to Computer (FOSDIC). For most items on the questionnaire, the information supplied by the respondent or obtained by the enumerator was indicated by marking the answers in predesignated positions that would be "read" by FOSDIC from a microfilm copy of the questionnaire and transferred onto computer tape with no intervening manual processing. The computer tape did not include information on individual names and addresses.

In the processing of the 100-percent data, all short forms and pages 2 and 3 of the long forms (which have the same questions as the short form) were microfilmed, "read" by FOSDIC, and transferred onto computer tape for tabulation.

The tape containing the information from the questionnaires was processed on the Census Bureau's computers through a number of editing and tabulation steps. Among the products of this operation were computer tapes from which the tables in this report (and most others in the 1980 census publications) were prepared on phototypesetting equipment at the Government Printing Office.

A more detailed description of the data collection and processing procedures can be obtained from the 1980 Census of Population and Housing, *Users' Guide*, PHC80-R1.

Appendix D.—Accuracy of the Data

SOURCES OF ERROR	D-1
EDITING OF UNACCEPTABLE DATA	D-1
ALLOCATION AND SUBSTITUTION TABLES	D-2

SOURCES OF ERROR

Since 1980 population counts shown in this report were tabulated from the entries for persons on all questionnaires, these counts are not subject to sampling error. In any large-scale statistical operation such as a decennial census, human and mechanical errors occur. These errors are commonly referred to as nonsampling errors. Such errors include failure to enumerate every household or person in the population, not obtaining all required information from respondents, obtaining incorrect or inconsistent information, and recording information incorrectly. Errors can also occur during the field review of the enumerators' work, the clerical handling of the census questionnaires, or the electronic processing of the questionnaires.

In an attempt to reduce various types of nonsampling error in the 1980 census, a number of techniques were introduced on the basis of experience in previous censuses and in tests conducted prior to the census. These quality control and review measures were utilized throughout the data collection and processing phases of the census to minimize undercoverage of the population and housing units and to keep the errors at a minimum.

EDITING OF UNACCEPTABLE DATA

The objective of the processing operation is to produce a set of statistics that describes the population as accurately and

clearly as possible. To meet this objective, certain unacceptable entries were edited.

In the field, questionnaires were reviewed for omissions and certain inconsistencies by a census clerk or an enumerator and, if necessary, a followup was made to obtain missing information. In addition, a similar review of questionnaires was done in the central processing office. As a rule, however, editing was performed by hand only when it could not be done effectively by machine.

There are two means by which incomplete or inconsistent data on the questionnaires were corrected during the editing process: allocation and substitution. Allocations, or assignments of acceptable codes in place of unacceptable entries, were needed most often when there was no entry for a given item or when the information reported for a person on that item was inconsistent with other information for the person. As in previous censuses, the general procedure for changing unacceptable entries was to assign an entry for a person that was consistent with entries for other persons with similar characteristics. It is believed that the assignment of acceptable codes in place of blanks or unacceptable entries enhances the usefulness of the data. The allocation technique may be illustrated by the procedure used in the assignment of unknown age. The allocation of this item was carried out in the following steps:

1. The computer stored reported ages of persons by selected characteristics, including sex, relationship, marital status, and characteristics of other household members.
2. Each stored age entry was retained in the computer only until a succeeding person having the same set of characteristics and having age reported was processed through the computer during the electronic edit operation. Then the reported age entry of the succeed-

ing person was stored in place of the one previously stored.

3. When the age of a person was not reported, or the entry was unacceptable, the age assigned to this person was that which was stored for the last person who otherwise had the same set of characteristics.

This process insured that the distribution of ages assigned by the computer for persons of a given set of characteristics would correspond closely to the age distribution of persons who had actually reported age in the census.

A second way in which corrections were made during the editing process was through substitution, that is the assignment of a full set of characteristics for a person. When there was indication that a housing unit was occupied but the questionnaire contained no information for all or most of the people, although persons were known to be present, a previously processed household was selected as a substitute, and the full set of characteristics for each substitute person was duplicated. These duplications fall into two classes: (1) "persons substituted for mechanical failure," e.g., when the questionnaire page on which persons were listed was not properly microfilmed, and (2) "persons substituted for noninterview," e.g., when a housing unit was indicated as occupied but the occupants were not listed on the questionnaire.

Specific tolerances were established for the number of computer allocations and substitutions that would be permitted. If the number of corrections was beyond tolerance, the questionnaires in which the errors occurred were clerically reviewed. If it was found that the errors resulted from damaged questionnaires, from improper microfilming, from faulty reading by FOSDIC of undamaged questionnaires, or from other types of machine failure, the questionnaires were reprocessed.

ALLOCATION AND SUBSTITUTION TABLES

The extent of allocations and substitutions in the editing process and their effect on each of the subjects are shown in tables B-1 to B-4a which follow table 39a. In these tables, "persons substituted" and "persons with one or more allocations" are stated as percentages of the total population.

There is a difference in the method of counting allocations between table B-4 on the one hand, and tables B-2 and B-3 on

the other hand. In table B-4, a person with one or more allocations whose record is duplicated for substitution purposes is counted twice (i.e., both "originally" and as a "substitute"). In tables B-2 and B-3, such a person is counted only once.

Table B-3 shows allocations of marital status for all persons; tables B-1, B-2, and B-4 provide these data only for persons 15 years old and over. In addition, allocation rates shown in table B-3 are not directly comparable with rates shown in table B-4 in the 1970 census reports

because marital status allocations were not included for persons of all ages in the 1970 rates.

The sum of the percentages of persons having assignments in each population characteristic is greater than the number of persons with one or more allocations because some persons had allocations for more than one characteristic. Not tallied, and therefore not included in these tables, are the allocations for missing information on quarter of year of birth; these allocations were made on a random basis.

1980 Census of Puerto Rico

DO	A1	A2	A4	A5 S	A6

Your answers are confidential

By law (title 13, U.S. Code), census employees are subject to fine and/or imprisonment for any disclosure of your answers. Only after 72 years does your information become available to other government agencies or the public. The same law requires that you answer the questions to the best of your knowledge.

A message from the Director, U.S. Bureau of the Census...

We must, from time to time, take stock of ourselves as a people if our Nation is to meet successfully the many national and local challenges we face. This is the purpose of the 1980 census.

The essential need for a population census was recognized almost 200 years ago when the Constitution of the United States was written. As provided by article 1, population censuses of the United States have been taken every 10 years. As part of the 1980 Census of Population and Housing, as required by title 13, United States Code, the U.S. Bureau of the Census is conducting the census of Puerto Rico as of April 1, 1980.

The law under which the census is taken protects the confidentiality of your answers. For the next 72 years — or until April 1, 2052 — only sworn census workers have access to the individual records, and no one else may see them.

Your answers, when combined with the answers from other people, will provide the statistical figures needed by public and private groups, schools, business and industry, and Federal, Commonwealth, and municipal governments. These figures will increase the understanding of how the Puerto Rican population and housing are changing. In this way, today's problems can be dealt with more effectively.

The census is a vitally important activity for Puerto Rico. Please do your part by filling out this census form accurately and completely. A census taker will visit your household to pick up the form; please keep it in a safe, convenient place until then.

Thank you for your cooperation.

Please continue →

INSTRUCTIONS FOR QUESTIONS 1 THROUGH 5

1. List in question 1 (on page 1), the names of all the people who usually live here. Then turn to pages 2 and 3 where there are columns to list up to seven persons. In the first column print the name of one of the household members in whose name this home is owned or rented. If no household member owns or rents the living quarters, list in the first column any adult household member who is not a roomer, boarder, or paid employee. Print the names of the other household members, if any, in the columns which follow, using question 1 as a checklist.
2. Fill a circle to show how each person is related to the person in column 1.

A stepchild or legally adopted child of the person in column 1 should be marked **Son/daughter**. Foster children or wards living in the household should be marked **Roomer, boarder**.
3. Be sure to fill a circle for the sex of each person.
4. Enter age at last birthday in the space provided (enter "0" for babies less than one year old). Also enter month and year of birth, *and* fill the appropriate circles. For an illustration of how to complete question 4, see the example. If age or month or year of birth is not known, give your best estimate.
5. Couples who live together should report the marital status they consider to be the most appropriate.

If the person lives in a marital union without having a civil or religious matrimonial contract, mark **Consensually married**.

If the person's only marriage was annulled, fill the **Never married** circle.

NOTE: This is a translation of the Respondent Instructions which were only provided in Spanish.

1. What is the name of each person who was living here on Tuesday, April 1, 1980, or who was staying or visiting here and had no other home?

[illegible]

- Any person away from here in the Armed Forces.
- Any college student who stays somewhere else while attending college.
- Any person who usually stays somewhere else most of the week while working there.
- Any person away from here in an institution such as a home for the aged or mental hospital.
- Any person staying or visiting here who has a usual home elsewhere.

Please continue

Guía Para la Localización de Tablas—Temas por Tipo de Área y Número de Tabla

La guía lista todos los temas cubiertos en este informe pero no indica todas las referencias recíprocas (por edad, sexo, etc.) ni los datos históricos presentados en algunas de las tablas. Datos sobre las tasas de asignación aparecen en las tablas B-1 a la B-4a. Para el significado de las abreviaturas, véase la Introducción. Para una descripción de las clasificaciones de las áreas, refiérase al apéndice A. Para las definiciones y explicaciones de las características de los temas, refiérase al apéndice B.

Tema	Puerto Rico		AECE, AEME, Áreas Urbaniza- das, Ciudades Centrales de AEME	Lugares ¹ de—				Municipios	
	Total	Urbana y Rural y Tamaño del Lugar, Dentro y Fuera de AEME		50,000 o Más	10,000 a 50,000	2,500 a 10,000	1,000 a 2,500	Total	Población Rural
EDAD									
Grupos de edad	16, 17	16	19, 20	19, 20	24, 25	29	—	33, 34	38
Años simples de edad	15	—	—	—	—	—	—	—	—
Años simples de edad hasta 21 años	16	16	19, 20	19, 20	24, 25	—	—	33, 34	—
PARENTESCO EN ALOJAMIENTOS DE GRUPO	18	18	21, 22	21, 22	26, 27	29	—	35, 36	38
CARACTERÍSTICAS DEL HOGAR									
Tipo de familia por presencia de hijos propios menores de 18 años .	18 ²	18 ²	23	23	28	29	—	37	38
Características de las personas en hogares	39	—	—	39	39	39	—	39	—
Parentesco	18	18	21, 22	21, 22	26, 27	29	—	35, 36	38
ESTADO CIVIL.	18	18	23	23	28	29	—	37	38
CARACTERÍSTICAS SUMARIAS Y CIFRAS DE POBLACIÓN	14	14	14	14	14	14	14, 30, 31	14, 32 ³	—

¹ Datos comparables para ciudades y/o pueblos se presentan por tamaño después de las tablas para lugares. Los números de las tablas corresponden a aquellos para lugares y tienen un sufijo de "a"; e.g., pueblos de 1,000 a 2,500 se presentan en las tablas 14a, 30a y 31a. ² Presenta datos sobre número de hijos propios. ³ Presenta datos para subdivisiones de municipios.
